Andrology Services Offered to Patients

Diagnostic semen testing

Comprehensive Semen Analysis with Kruger Strict Morphology..... \$185
Includes volume, concentration, motility and morphology using Kruger criteria (best correlation for predicting fertilization rates in vitro). It is also very helpful to determine which patients might benefit from IUI versus IVF procedures. Kruger strict morphology is used at RCC instead of the sperm penetration assay (SPA or HEPT) in order to predict fertilization capability and the need for ICSI. This is the initial test recommended by RCC physicians for evaluation of male infertility.

Other tests are available depending on specific needs of the patient.

Reports are usually completed within 3 days of sample collection

Board certified reproductive endocrinologists are available daily to answer clinician questions regarding the interpretation of the results.

Semen analysis testing must be scheduled in advance by calling 801-878-8888. Testing is available M-F.

Intrauterine insemination (IUI) related services for married couples (available 7 days per week)

Semen preparation (husband's sample) \$160
(includes basic semen parameter testing, IUI prep, report, syringe and catheter)
Donor sample preparation for IUI (IUI ready sample) \$98
(includes semen thaw, basic semen parameter testing, report, syringe and catheter)
Donor sample processing and preparation for IUI (intracervical insemination sample).....\$213
(includes semen thaw, basic semen parameter testing, wash and preparation, report, syringe and catheter)
Intrauterine insemination by RCC staff \$196

Samples can be prepared for insemination by RCC staff or by the ordering physician's staff Anticipated IUI procedures should be scheduled by calling 801-878-8888 by 2 pm prior to the day of insemination. Please review the clinical information with RCC nursing staff.

After hours, calls to the office will be referred through the answering service to the RCC physician on call.

Donor sperm samples must be ordered from any AATB/FDA approved Cryobank. A tank and specimen handling fee of \$50 is charged for each shipment received. Samples may be stored at -RCC. Storage fee is \$435/year (arranged in advance).

Semen samples collections may be obtained by masturbation (spouse welcome if desired) in a private, quiet room provided by RCC or at home (containers and instructions supplied – sample must be kept warm). Collections may also be completed using special condoms (\$12.25) available at RCC or on the web at <https://www.INGfertility.net/>.

Payment for the above services, are expected at the time the service is provided. Prices above assume that services are offered on a pre-paid cash basis. Checks, cash and credit cards are accepted. A receipt will be provided if a patient desires to file for insurance reimbursement. We are preferred providers for United Healthcare and Aetna. Insurance billing is only provided for these specific companies. Insurance prices are usually higher than the pre-paid cash prices.
